# Agenda

- The Need - Learning Objectives
- The summary of our Journey
- How North Carolina worked together to formulate our standards
- How did we apply the standards to aggregate data
- The Vision of the Future

# Learning Objectives

- There is a National and local need for collection of Health Related Social Needs (HRSN) in a standardized way.
- How teams in North Carolina have collaborated to standardize the collection and exchange of HRSN data.
- Future state of standardized data and how it can work for you

# Our Journey So Far...

# How can data & technology help us promote whole person health?

## Whole person health –

- Considering the interrelated needs of a person – both physical & behavioral, internal & external
- Focusing on non-medical drivers of health in addition to clinical drivers

## Health related social needs (HRSN – aka, SDOH) –

- 80% of a person’s health is **not** related to health care
- Addressing HRSN can reduce medical costs and negative health outcomes

## Healthy Opportunities Pilots Celebrate Two-Year Anniversary

Los proyectos piloto de Healthy Opportunities celebran su segundo aniversario – Versión en español abajo

PRESS RELEASE — The North Carolina Department of Health and Human Services is celebrating two years of the Healthy Opportunities Pilots in North Carolina and announcing the intent to expand these life-saving services statewide. The Healthy Opportunities Pilots is a first-of-its-kind innovative program that is described as a “life changer” for thousands of North Carolina families. The program addresses people’s social needs with services like food, housing, transportation and services related to interpersonal violence and toxic stress. Preliminary research also shows a significant savings in medical costs to the state of North Carolina from Healthy Opportunities Pilots participants.

# How can data & technology help us promote whole person health?

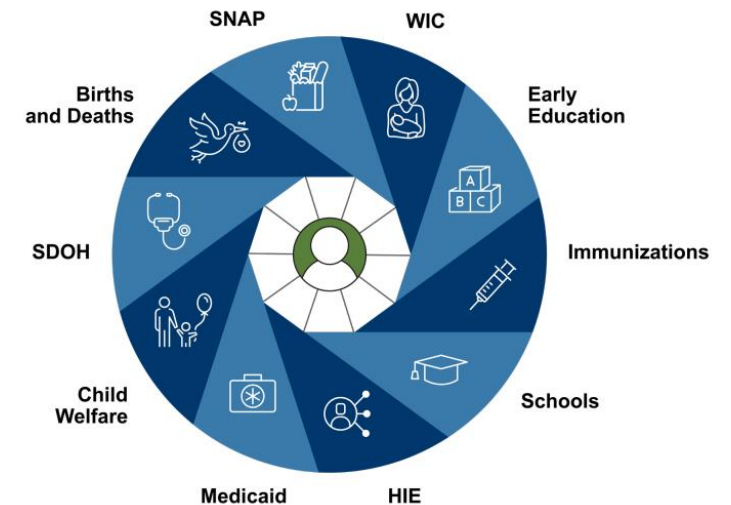

## Different types of data & technology can help us address HRSN:

- **Screening data** – to understand a person’s HRSN
- **Referral technologies** – to refer people to community-based services
- **Integrated data** – to connect information from systems to design outreach, program enrollment, and referral efforts

## Key data & technology challenges:

- Fragmented data systems
- Challenging & complex data collection, sharing, exchange processes
- Duplication of information collected places burden on individuals & health system partners

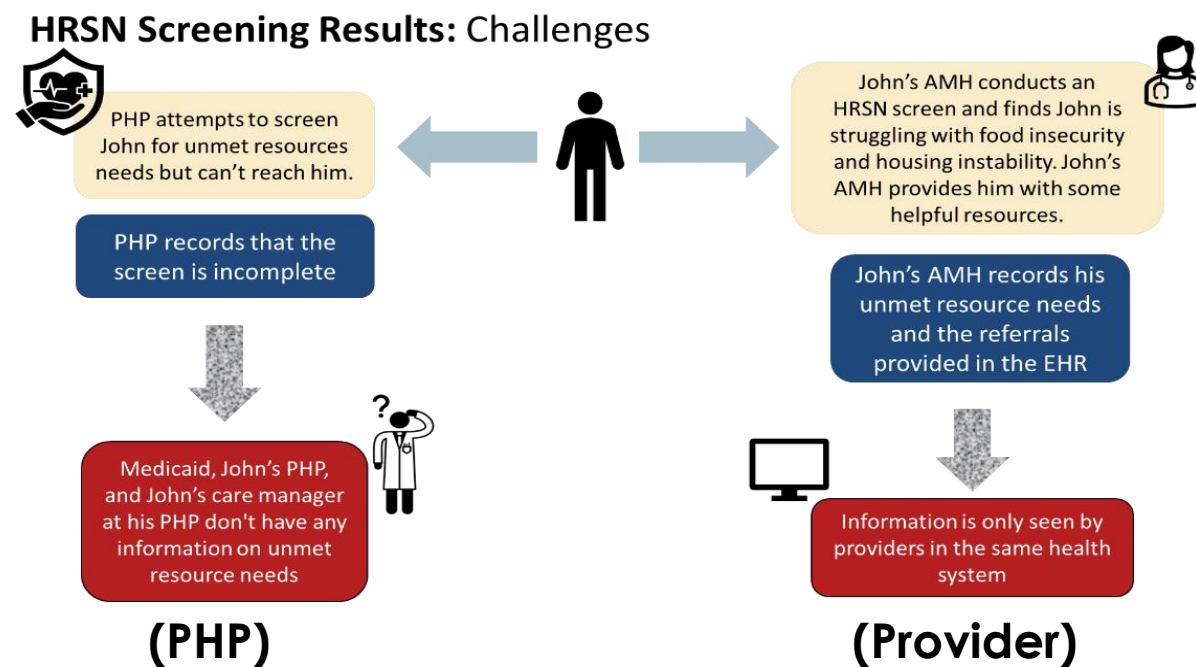

Health Screening		
We believe everyone should have the opportunity for health. Some things like not having enough food or reliable transportation or a safe place to live can make it hard to be healthy. Please answer the following questions to help us better understand you and your current situation. We may not be able to find resources for all of your needs, but we will try and help as much as we can.		
	Yes	No
<b>Food</b>		
1. Within the past 12 months, did you worry that your food would run out before you got money to buy more?		
2. Within the past 12 months, did the food you bought just not last and you didn't have money to get more?		
<b>Housing/ Utilities</b>		
3. Within the past 12 months, have you ever stayed: outside, in a car, in a tent, in an overnight shelter, or temporarily in someone else's home (i.e. couch-surfing)?		
4. Are you worried about losing your housing?		
5. Within the past 12 months, have you been unable to get utilities (heat, electricity) when it was really needed?		
<b>Transportation</b>		
6. Within the past 12 months, has a lack of transportation kept you from medical appointments or from doing things needed for daily living?		
<b>Interpersonal Safety</b>		
7. Do you feel physically or emotionally unsafe where you currently live?		
8. Within the past 12 months, have you been hit, slapped, kicked or otherwise physically hurt by anyone?		
9. Within the past 12 months, have you been humiliated or emotionally abused by anyone?		

# How can standardized HRSN data exchange improve whole person health?

## Key challenges:

- Multiple screening tools for collecting HRSN data among North Carolina health system partners
- The lack of consistency in the wording of various HRSN questions
- The lack of a standard way of storing and exchanging HRSN data among North Carolina providers
- Differing data standards that can be used to collect, store, and transmit HRSN data
- Differing technology solutions and approaches to exchange and access HRSN data

# How can we standardize HRSN screening information?

Variability between entities on common HRSN domain questions

Variation Types	SDOH Domain	High-level Question	Version 1 of Question	Version 2 of Question

## Questions and Answers

The first version of the SDOH program include 6 questions, the question LOINC code, each question's available answers and the answer LOINC codes. It's expected that each transmission of questions and answers to NC HealthConnex will include all 6 questions and their answers.

Participants can choose to send either the LOINC code and corresponding answer Codes, or the Alt LOINC Code and corresponding answer codes.
